

SAHDEV CHAUHAN

Address: 13 Oakland Avenue, Leicester LE4 7SG **Email:** Sahdev_92@hotmail.com

Contact: 07515 374263

I am an MSc Computing graduate who enjoys web development and theoretical aspects of technology. Previously, I graduated with a 2:1 in BSc Computing. I am a self-motivated individual full of creativity and commitment to any given task. Working at my own initiative, as part of a team and inspiring team spirit plays a significant role to how I work. I strive to improve my skills and abilities to become a proficient developer.

PERSONAL PROFILE

- **Passionate about computers:** Very eager to learn new areas within an ever changing landscape of technology.
- **Knowledgeable in various programming languages and frameworks:** HTML, CSS (LESS), VB.NET, C#, JavaScript, JQuery, SQL, Bootstrap (V3 and V4) and Handlebars.
- **Experienced in many industry used software:** such as Visual Studio 2013+. SQL Server Management Studio 2014+, Eclipse IDE, Atom, Enterprise Architect, Adobe Photoshop and Github/GitLab.
- **Experienced in use of operating systems:** Experience in Windows, Apple and Linux platforms.
- **Punctual and reliable:** Attained over 97% attendance score throughout school, college and university.
- **Excellent final year results:** Achieved a second class, upper division (2:1) in MSc Computing. With these results in mind, it demonstrates my perseverance as a student who wants to achieve his best.

EDUCATION

- (2014-2016) De Montfort University**
MSc Computing (graduated with a 2:1):
- | | |
|-----------------------------|--|
| Computer System & Networks | E-Commerce Software |
| Database Systems & Design | E-Commerce Systems |
| Systems Analysis & Design | Research, Ethics, and Professionalism in Computing |
| Object Oriented Programming | Human Factors in Systems Design |
| Project/Dissertation | |
- (2011-2014) De Montfort University**
BSc Computing (graduated with a 2:1):
The main module of this course was the computing project. This project consisted of a web application for video gamer's to contribute and interact with each other, based on the MVC framework in ASP.NET. I also studied other modules, such as Multimedia & Internet Technology, Database Design & Concepts, Systems Development, Computer Technology and more.
- (2009-2011) Leicester College**
BTEC National Certificate IT Practitioners (achieved Double Distinction):
I studied a range of modules, all consisting in the field of computing. My favourite modules in this course were Computer Animation, Developing Computer Games, Website Production & Management and Digital Graphics & Computing.
- (2008-2009) Leicester College**
BTEC National Diploma IT Practitioners (achieved Distinction):
The modules I studied in this course were Website Development, Databases, Spreadsheets, Networking Essentials, Computer Systems and more. My favourite module was Website Development, as this module alone got me interested in the field of Website development and design.
- (2003-2008) Rushey Mead Secondary School**
10 GCSE including English, Maths & Science (achieved grade C and above)

WORK EXPERIENCE

(January 2017 – Present) Freelance Web Developer

Duties: Currently working as an independent web developer for local businesses across Leicester/Leicestershire. I work with clients through the design, development and deployment stages. Additionally, I provide graphic design (creating business cards, brochures, flyers, roller banners) and web hosting consultation services.

Transferrable skills:

- **Time Management:** Each project has tight deadlines, and therefore I have to ensure all tasks specified by the client(s) are achieved with excellent results. This meant relying on using existing CMS's (WordPress), which allows me to place focus on the design specifications set by the client.
- **Ability to work under pressure:** Clients tend to change schedules, which leads to less development time. I have to ensure that I get the work done as required by the client.
- **Problem Solving:** If a client is facing issues with their website, I have to find out the exact problem, and resolve it as soon as possible.

(March 2018 – June 2018) Software Developer at **IGS Solutions Ltd.**

Duties: Contracted to work with a team of developers in creating and maintaining systems/applications for clients across the country. Dealt with technical issues and created new features for a range of systems.

Transferrable skills:

- **Team work:** I worked together with a team of developers, taking orders from project leads and completing tasks when given.
- **Time Management:** Each project had a deadline, and therefore I had to ensure all tasks specified were achieved with excellent results.
- **Ability to work under pressure:** There were multiple tasks to complete within a day alone; I had to ensure that each task was completed until I could move onto the next one.
- **Problem solving:** If an issue occurred, the first step was to find what the exact problem was, then to resolve it by implementing a viable solution that would prevent this issue from appearing in the future.

PREVIOUS WORK EXPERIENCE:

(June 2015 – June 2016) Junior Software Developer at **United Pallet Network Ltd.**

(October 2012 – June 2013) Website Designer/Developer at **Beed Studios (Voluntary Work Experience)**

SOFTWARE AND HARDWARE SKILLS

- Abundant knowledge on Laptop, Desktop and Mobile technologies.
- Practical design experience in Adobe Photoshop.
- Experienced in creating custom WordPress themes and setting up WordPress.
- Have experience in many Linux distributions (e.g. Ubuntu, Debian, Fedora etc.).
- Have built, repaired and maintained computer systems in the past.

ADDITIONAL INFORMATION AND INTERESTS

- **Transport:** Hold a full clean UK driving license.
- **Sports:** I am a massive fan of Football and I regularly keep fit and active by going gym at least 3 times a week.
- **Digital Artist:** In my spare time, I use a wide range of tools to draw objects of interest. Additionally, I use Adobe Photoshop and Illustrator to help improve my pieces of work.
- **Video Editing:** Another of my hobbies is video editing, which I use to manipulate and enhance recordings. I use Adobe After Effects as my main video editing tool which has allowed me to create incredible work.
